

LIFE TICINO BIOSOURCE

LIFE15NAT/IT/000989

Presented by Milo Manica

Fondazione Lombardia per l'Ambiente

Speed presentations – ARC Platform Meeting – 22nd May –
Santander, Spain

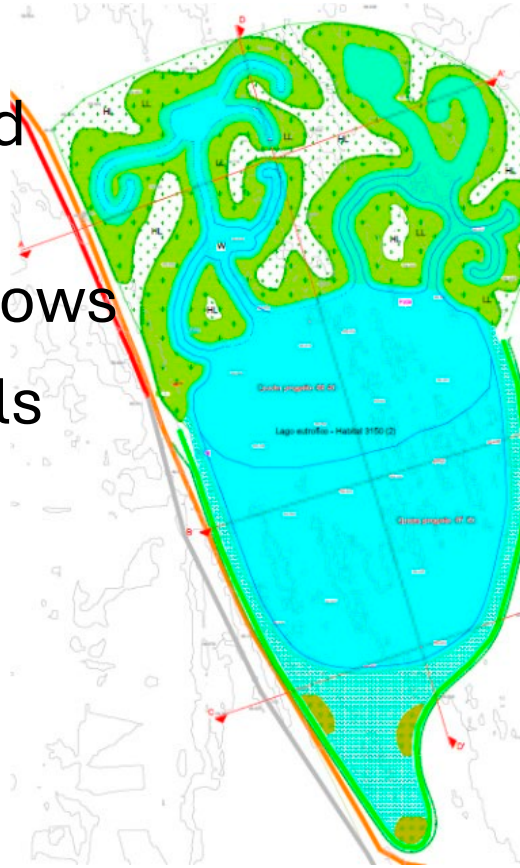

Objectives

- **Preservation and increase of biodiversity** in Ticino Park, “source area” for the Po river Plain and the most important ecological corridor between Alps and peninsular Italy
- **Conservation of 17 species** of community interest (Amphibians: *Rana latastei*, *R. dalmatina* and *Hyla intermedia*)

Results

- Creation and restoration of wetland habitats
- Management of lowland wet meadows
- Engagement of farmers and schools
- Increasing populations of target species
- Awareness of the issue of invasive species

Key Messages to Share

- Lots of interventions in different areas
- Attention to invasive species (e.g. *Procambarus clarkii*, *Trachemys scripta*)
- Consideration of mitigation measures for climate change in wetland management

Thanks for your attention
