

A photograph of a frog, possibly a Common Frog, sitting in a pond. The frog is light brown with dark spots and is surrounded by green reeds and water. The text "LIFE-IP: N2K Revisited" is overlaid on the image in a large, white, sans-serif font. A thin white horizontal line is positioned below the title.

LIFE-IP: N2K Revisited

Presented by Jonáš Gaigr
Nature Conservation Agency of the Czech Republic

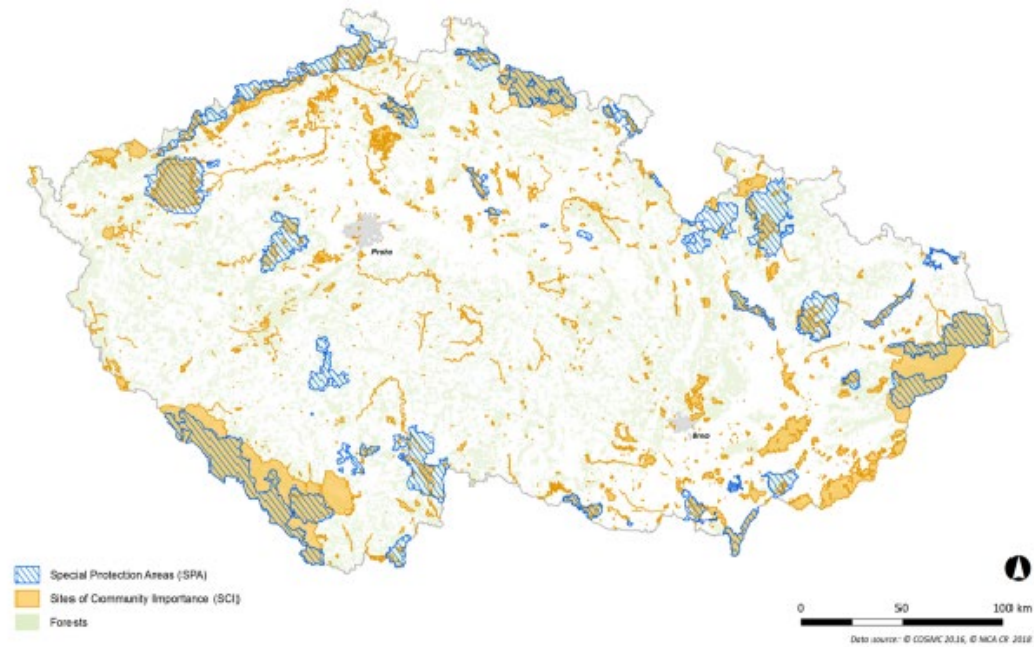

Speed presentations – ARC Platform Meeting – 22nd May –
Santander, Spain

Objectives

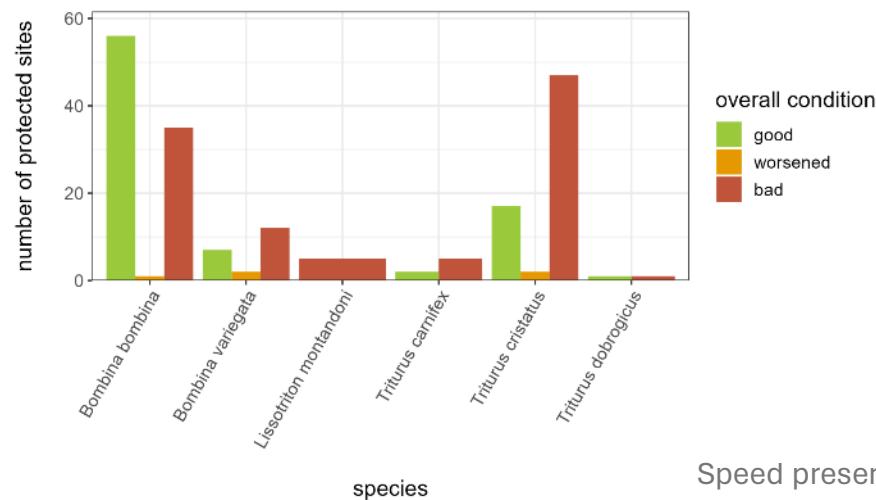

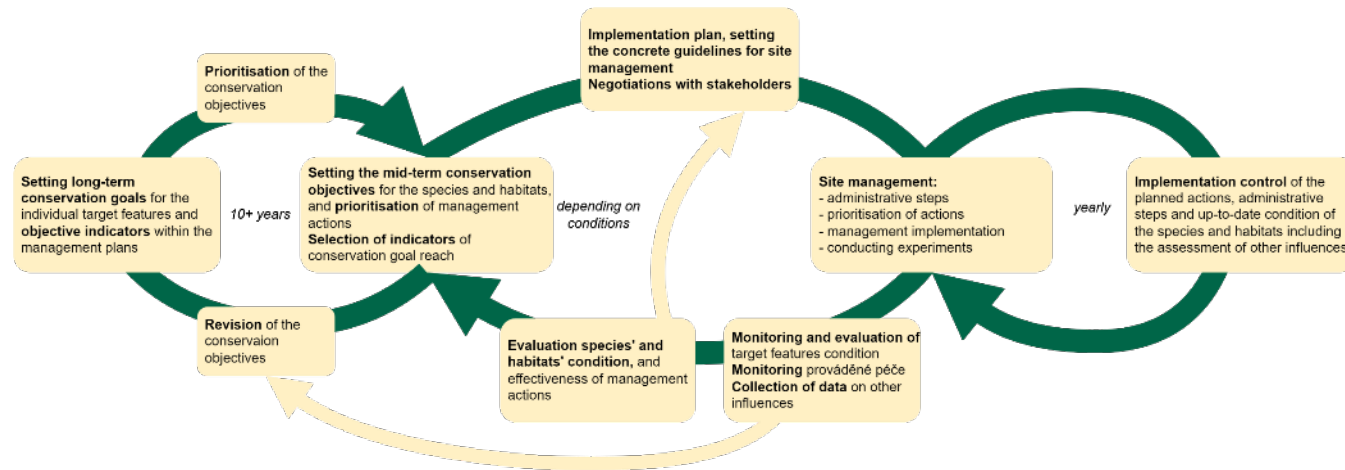

- Implementation of **adaptive management** framework within the Natura 2000 network in Czechia
- Direct action to support the **species and habitats**
- Involvement of **key stakeholders**
- Evaluation of **ecosystem services** and conservation costs
- **Dissemination** of results and good practice

I. Climate Change and Protected Areas

I. Climate Change and Protected Areas

Highlights, Issues & Lessons Learnt

- The **adaptive management toolbox** is in place and working
- Implementing **systemic change** takes (a lot of) resources and will face opposition
- Defining the individual steps and **communicating** them is crucial

Key Messages to Share

- Implementing **adaptive management** requires **tools**
- **Monitoring** results based on detailed data **empowers site managers**
- Involving the **key stakeholders** is crucial
- Informing about the **benefits** associated with species' conservation
